

DC-feed throughs, ground connection ...

DC-feed throughs

We offer various models of teflon isolated DC-feed throughs. Type D1 and KF1 are delivered without nut and tooth lock washer.

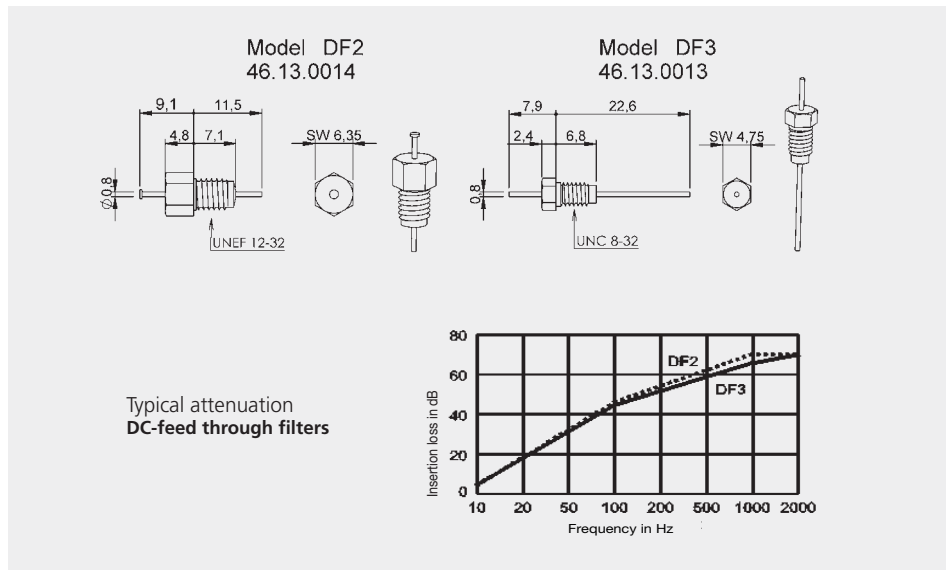

DC-feed throughs filters

Feed throughs filters prevent over power supply, that the rf-signals enter respectively treat out of enclosures.

Technical data about DC-feed through filters

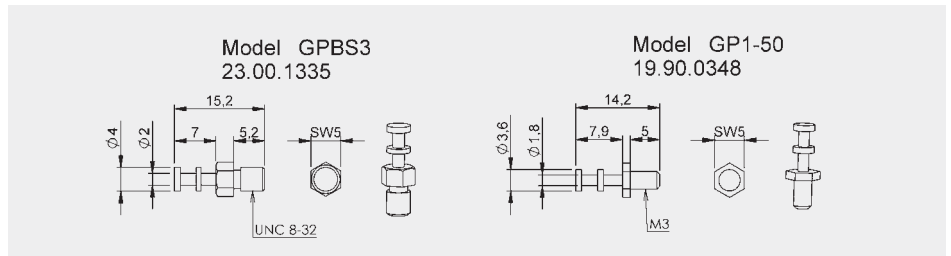

Type	max. voltage (+85°C)	max. current
DF2	350 V DC	10 A
DF3	200 V DC	10 A

Delivered with nut and washer.
Technical data sheets are available on request.

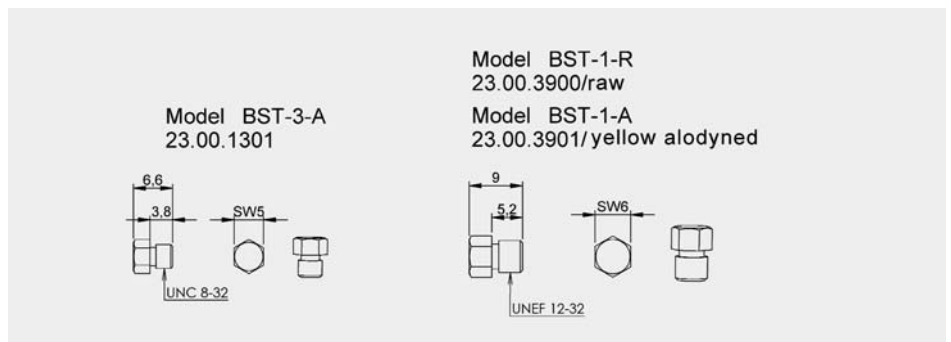

Ground connections, GP series

2 different types are available.
Brass tinned ground connections,
solderable passivated

Blind plug, BST Series

Made out of aluminum,
3 types are available

Soldering lug (100 units)

Brass, silver plated
Accessories EH-series
